## NSERC USRA

- Undergraduate Student Research Awards
  - UVic CSc awarded 8+ for May'06 to Apr'07
  - work with NSERC research awardees
  - \$4,500/term plus 25+% top-up
  - deadline: Feb 20 for May'06; June 16 for Sep...
- For more details
  - go to: google.com; key in: nserc usra
  - click: "I'm Feeling Lucky"

1/10/06

CSc 461/561

2

## IBM Extreme Blue

- Summer 2006 internship
  - [www.ibm.com/extremeblue](http://www.ibm.com/extremeblue)
  - IBM Toronto or Ottawa Software Lab
  - as well as location in US and elsewhere
  - working in a team of 3 technical students and 1 business student
  - working with technical and business mentors
  - application deadline: Jan 31, 2006

1/10/06

CSc 461/561

3

## Sound is a wave

- How we hear
  - mouth / transmitter
  - air / cord
  - ear / receiver
- Continuous in both
  - time
  - amplitude

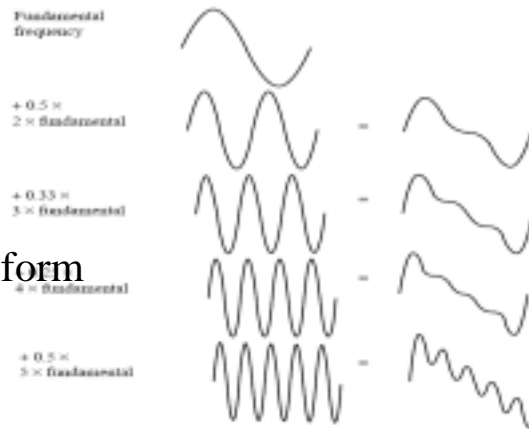

1/10/06

CSc 461/561

4

## A wave of many *waves*

- Frequency
  - pitch
- Amplitude
  - loudness
- Fourier Transform

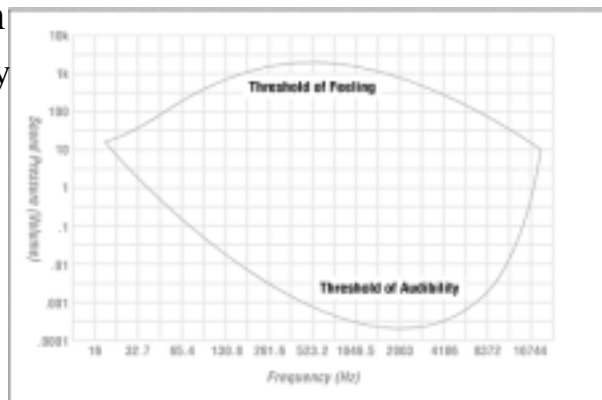

1/10/06

CSc 461/561

5

## Not all waves are equal

- For human
  - frequency
  - volume

1/10/06

CSc 461/561

6

# Sampling and quantization

1/10/06 CSc 461/561 7

# Sampling rate

- If  $\text{sampling\_freq} = \text{true\_freq}$ 
  - in this example, a constant signal
- If  $\text{sampling\_freq} = 1.5x \text{ true\_freq}$ 
  - an  $\text{alias\_freq}$  of  $0.5x \text{ true\_freq}$

1/10/06 CSc 461/561 8

## Nyquist Theorem

- If a signal is bounded by frequency ( $f_1, f_2$ ), then the sampling rate should be *at least*  $2(f_2 - f_1)$  to reconstruct the signal
- Human can hear 20Hz - 20KHz
  - CD sampling rate: 44.1KHz
- Human voice 300Hz - 4KHz
  - telephone systems sampling rate: 8KHz

1/10/06

CSc 461/561

9

## Alias frequency

- If  $\text{sampling\_freq} \geq 2 \times \text{true\_freq}$ 
  - $\text{true\_freq}$  is recovered
- If  $\text{sampling\_freq}$  in  $[\text{true\_freq}, 2 \times \text{true\_freq})$ 
  - $\text{alias\_freq} = \text{sampling\_freq} - \text{true\_freq}$
- If  $\text{sampling\_freq} < \text{true\_freq}$ 
  - $\text{true\_freq}' = \text{true\_freq} \bmod \text{sampling\_freq}$
  - follow the first two approaches

1/10/06

CSc 461/561

10

## Quantization depth

- How many bits per sample
  - In this example: 2 bits
  - telephone systems: 8 bits; CD: 16 bits

## Quantization noise

- Quantization is lossy
- More bits, less information loss
- Signal-to-quantization-noise ratio
  - defined as a (log) ratio of signal/noise power
  - one more bit can add 6 db to SQNR

$$\begin{aligned}
 SQNR &= 20 \log_{10} \frac{V_{\text{signal}}}{V_{\text{quant\_noise}}} = 20 \log_{10} \frac{2^N - 1}{2} \\
 &= 20 \times N \times \log 2 = 6.02 N(\text{dB}) \quad (6.3)
 \end{aligned}$$

## Not all quantizer are linear

- Nonlinear/non-uniform quantization
  - humans are more sensitive to *small* changes from *small* values
- u-law or A-law (more bits for small values)

## Pulse Code Modulation (PCM)

- Band-limit filter
  - sampling rate: 8KHz
- Quantizer
  - sample size: 8-bit (output) with u-law or A-law
- Data rate: 64Kbps (output)
- Reconstruction: low-pass filter
- G.711

## Delta Modulation (DM)

- Prediction
  - If current  $>$  last, output 1 (to increase)
  - if current  $<$  last, output 0 (to decrease)
- slope overload
  - change too fast
- granular noise
  - change too slow

1/10/06

CSc 461/561

15

## Differential PCM (DPCM)

- Predictor
  - Predict the current based on the history
- Quantizer
  - quantize the difference

1/10/06

CSc 461/561

16

## Adaptive DPCM (ADPCM)

- Adaptive quantizer
  - adapt quantization step to the difference

- G.723: 8KHz, 4-bit, 32Kbps

1/10/06

CSc 461/561

17

## This lecture

- Audio presentation
  - sampling rate, alias frequency
  - quantization depth, SQNR
  - PCM, DPCM, ADPCM
- Explore further
  - MIDI [Li&Drew 6.2]

1/10/06

CSc 461/561

18

## Next lecture

- Multimedia representation
  - image [Ref: Li&Drew Chap 3-4]
    - bitmap vs vector
    - gray-scale vs color [3.1.1/2, 3.1.4-6]
    - picture resolution, pixel depth
    - color space (RGB, CMY, YUV) [4.2.1-3, 4.3.2]
    - gamma correction [4.1.6]
