

# Topics in Advanced Computer Networks Summer 2007

- What's *hot* in computer networks?
  - overlay network architectures
  - peer-to-peer application models
  - end-to-end control mechanisms
  - service provisioning
  - network measurement
  - to support VoIP, IPTV, MMOG, etc
- How
  - read new papers, do real projects, and make impressive presentations!
- Who
  - <http://www.cs.uvic.ca/~pan/csc485>
  - and you!!!
